## MAIN FEATURES

### • Dust-free system

The **CP-D70DW-S** is ideal for environments that suffer a higher level of pollution or dust. It has **in-built separators that are designed to circulate the air more efficiently**, keeping the heads separated from the power supply and reducing the level of contamination in the printing zone.

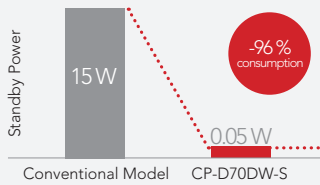

### • High resolution

Mitsubishi Electric printers have a new image processing system that makes it possible to reproduce softer edges and more natural pictures at 300DPI.

### • Energy saving

With consumption of less than one watt, the **CP-D70DW-S** is designed to reduce energy consumption up to 96% in sleep mode compared with other Mitsubishi Electric models.

## SPECIFICATIONS

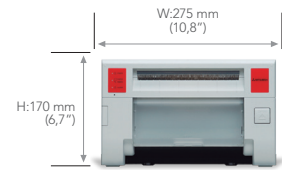

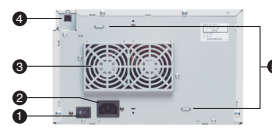

#### Front panel

- 1 Paper strip bin
- 2 Alarm indicator
- 3 Paper ribbon indicator
