This digital colour printer complies with the requirements of the EC Directive 89/336/EEC, 73/23/EEC and 93/68/EEC. The electro-magnetic susceptibility has been chosen at a level that gains proper operation in residential areas, on business and light industrial premises and on small-scale enterprises, inside as well as outside of the buildings. All places of operation are characterised by their connection to the public low voltage power supply system.

SAFETY PRECAUTIONS

In the interest of safety, please observe the following precautions:

POWER REQUIREMENT
This product is designed for operation on 220-240V AC 50/60Hz. Never connect to any outlet or power supply having a different voltage or frequency.
WARNING: THIS APPARATUS MUST BE GROUNDED.
AVERTISSEMENT: CET APPAREIL DOIT ETRE MIS A LA TERRE.

PROTECTIVE MEASURES

IF ABNORMALITIES ARISE, ....
If the printer emits smoke or abnormal sounds, immediately unplug the power cord from the printer or power outlet. Continued use may be dangerous. Contact your dealer about having the printer checked and serviced.

NEVER INSERT ANY OBJECT INTO THE UNIT
Nothing other than supplies for this printer should ever be inserted into the printer. Other items can cause a safety hazard and extensive damage to the mechanism and electronics.

DO NOT SET HEAVY OBJECTS ON TOP OF THE UNIT
Heavy objects can damage the unit and/or cause misoperation.

AVOID DAMAGING THE POWER CORD
Do not set anything heavy on the power cord nor allow it to become pinched, or cut. If the power cord becomes damaged, replace it immediately to avoid shock hazard or electrical fire.
When the power cord is replaced, use the same type as originally supplied; it is designed to reduce interference to radio & TV reception.
When unplugging the power cord, hold the plug, and remove it carefully.

KEEP THE UNIT DRY - DO NOT PLACE WATER OR OTHER LIQUID CONTAINERS, FLOWER VASES/POTS ON TOP OF THE UNIT
Liquids that get into the unit can cause serious damage to the unit and potential shock or fire danger. If liquid is spilled into or seeps into the unit, unplug the Power Cord immediately and seek service as soon as possible to avoid additional or possible damage due to corrosion.
“In the interest of safety, avoid handling of liquids near the unit.”

DO NOT REMOVE THE CABINET. THERE ARE NO USER SERVICEABLE PARTS INSIDE AND YOU WILL EXPOSE YOURSELF TO HAZARDOUS VOLTAGES AND/OR YOU MAY CAUSE DAMAGE TO THE UNIT.
Touching internal parts is dangerous, and may cause a malfunction. Contact your dealer to carry out internal checks and adjustments. Disconnect the power cord before opening the cover to clear a paper jam, etc.

UNPLUG THE POWER CORD DURING A LONG ABSENCE OR DURING AN ELECTRICAL STORM
Turn off the Main Power switch and unplug the power cord during a long absence or during an electrical storm.

WHEN TRANSPORTING THE UNIT
When transporting the unit, remove the ink cassette and paper. And make sure to attach the shipping inserts on the slot or the rollers may be deformed.

DO NOT INSERT YOUR FINGERS OR ANY OBJECT INTO THE PAPER OUTLET DURING PRINTING
Inside the paper outlet is a roller for taking out the print paper. If you insert your fingers, you may get injured.

DO NOT TOUCH THE THERMAL HEAD
It becomes hot during printing and may remain hot for a time, causing injury. Oils, salts and moisture from your hands will contaminate the head and may spoil the prints.

CONNECTING CABLES
Use the power cord supplied with the printer.
MAINTAIN GOOD VENTILATION
Ventilation slots and holes are provided on the rear of this unit. Place the unit on a hard and level surface and locate at least 17 cm (6.7 inches) (top) and 5 cm (2 inches) (sides), from walls to insure proper ventilation. When installing the unit in a system rack, leave space between the unit and the back of the rack.

UNSUITABLE LOCATIONS
Avoid installing the printer in unstable locations with high vibration or in hot-springs areas where hydrogen sulfide and acidic ions are likely to be generated.

PLACES WITH HIGH HUMIDITY AND DUST
Do not place the unit in locations with high humidity and dust. They can cause extensive damage. Avoid places where unit is likely to be exposed to oily fumes and vapours.

PLACES LIKELY TO BE EXTREMELY HOT
Places exposed to direct sunlight, or near heating appliances can attain extremely high temperatures which may deform the cabinet, or cause other damage.

PLACE THE UNIT ON A HORIZONTAL SURFACE
The unit is likely to be affected if it is operated when tilted, inclined or in unstable places.

PROTECT AGAINST DEW FORMATION
When the unit is moved from a cold area into a warm area, moisture can condense inside the unit and prevent operation. Allow the temperature to stabilize before use.

OPERATING AMBIENT TEMPERATURE RANGE
The operating temperature range is 5°C to 35°C (41°F - 95°F) and humidity of 30 - 80%. When using the unit in a system rack, make sure that the temperature inside the rack does not exceed this range.

UNSUITABLE MATERIALS FOR THE PRINTER
Paint coat flaking and plastic deformation are likely to occur if the unit is wiped with chemical dusters, benzine, thinner or any other solvent, if rubber or PVC items are left in contact with the unit for a extended period, or if the unit is sprayed with insecticide.

CARE OF THE CABINET
Unplug and clean with a soft cloth slightly moistened with a mild soap and water solution. Allow to dry completely before operating. Never use petroleum based solutions or abrasive cleaners.

HEAD ABRASION
The thermal print head, like a video head, wears out. When it is worn, it becomes hard to print out fine details of the picture. Then it is necessary to replace the thermal head. Consult your dealer about having the head replaced.

CONNECTING DEVICES
Read thoroughly the Safety Notices, Cautions and “Operating Precautions” of the instruction booklets for the other devices connected with the unit.

CAUTION ON RELOCATING
When transporting the unit, make sure it is not likely to be subjected to impacts. This can be a primary cause for damage. Before moving the unit, make sure to disconnect the power cord from the power outlet, and the cables from the connected devices. Also make sure to remove the paper tray.
Dust or other foreign matter adhering to the print paper or the ink cassette, or deformation resulting from exposure to extremely low or high temperatures could cause loss of colour, uneven colour or lines, or wrinkles in the print images.

NOTE:
MEMORIZED IMAGES ARE STORED IN VOLATILE MEMORY AND MAY BE LOST IN THE EVENT OF POWER FLUCTUATION OR MALFUNCTION.
SPECIAL FEATURES

2 PRINT SIZES ARE AVAILABLE DEPENDING ON INK SHEET
2 printing sizes are available depending on the 3-color YMC ink sheet being used. There are 2 types of ink sheet, matte and gloss, to achieve the print finish required.

PRINTER DRIVER
The printer driver supports Windows® 98, Windows® Me, Windows® 2000 and Windows® XP.

PRINTING
This printer employs cut paper. Printing speed is approx. 77 seconds (in A4 size print).

HIGH QUALITY PRINTING
High quality print is available in dye sublimation mode. The printer can generate 256 gradients in each YMC, approximately 16,700,000 colours total.

314 PPI HIGH RESOLUTION
314 PPI (Pixels Per Inch) high resolution gives precise illustrations and sharp photo images.
UNPACKING

Take the unit out of the box by the following procedures. Make sure to check the contents.

1. Open the top of the box and remove the cardboard.

2. Remove the cushion with its contents. Be careful not to drop the contents.

3. Take the unit out of the box carefully. Make sure to keep the unit horizontal.

4. Unwrap the packing. Save the packaging in case you need to ship the printer.

CONTENTS
Make sure to check the supplied contents on the cushion.

Power cord (1)
CD-ROM (1)
Ink cassette (1)
Paper tray (1)
Quick setup guide (1)
FEATURES & FUNCTIONS

FRONT PANEL

1 POWER BUTTON
Press to turn on power. Press again to turn off power. When the power is turned on, POWER indicator illuminates.

2 POWER INDICATOR
When the unit is turned on, this lamp lights up.

3 ALARM INDICATOR
When a paper jam occurs, this indicator blinks. When the top cover is open or an error concerning the combination of print paper and ink sheet occurs, it lights up.

4 MEDIA INDICATOR
When an error concerning print paper or ink sheet occurs or this unit is initializing, this indicator blinks. When an error concerning the combination of print paper and ink sheet occurs, it lights up.

5 DATA INDICATOR
When this unit is overheated or transferring data, this lamp blinks. It lights up during printing.

6 READY INDICATOR
When this unit is overheated, continuous printing is cancelled, or during initialization, this indicator blinks. It lights up during data transfer, during printing, or when printing is available.

7 CANCEL BUTTON
Press to cancel continuous printing. See page 8 for continuous printing.

8 OPEN BUTTON
Press to open the top cover. Open the top cover when installing an ink sheet or clearing a paper jam.

NOTE
Do not press OPEN button during printing. Doing so may cause a print error and malfunction of the printer.

9 PAPER TRAY
Sets print paper. Remove shipping inserts before using. Printed paper comes out on this tray. Make sure to install it when using the printer. See page 12 for installing the tray.
FEATURES & FUNCTIONS

REAR PANEL

1 USB PORT
Use this terminal to connect the unit to a device equipped with USB interface such as a personal computer. See page 9 for connection.

2 AC LINE SOCKET
Connects to the provided power cord. Insert the cord firmly.

CANCELLING CONTINUOUS PRINTING

When printing two or more copies of one image, you can use continuous printing. The number of the copies can be set by the printer driver. Refer to the Read Me in the CD-ROM for setting the continuous print option.

How to cancel continuous printing

1 Press CANCEL button during continuous printing on A4 size image.

2 READY indicator blinks. After completing the current print, continuous printing is cancelled.

NOTE
Cancelling continuous printing is applicable only for A4 size image.
CONNECTIONS

CONNECTION WITH USB INTERFACE

CONNECTING WITH A PERSONAL COMPUTER

1. Make sure to turn off the personal computer.

2. Connect this unit with the personal computer as following example.

3. Connect the power cord.

- Use the printer driver to adjust settings for the printer.
  The printer driver is included in the CD-ROM. See page 15 for the details.
BEFORE OPERATION

Before printing,
1. Remove the shipping inserts on both sides of the paper tray inserting slot and **the spacer inside** the paper tray. (See below)
2. Install the ink cassette with **the ink sheet installed**. (page 11)
3. Install the paper tray with **print paper installed**. (pages 12-13)
4. Install printer driver.

### PAPER SHEET SET

Make sure to use the following types of paper sheet and ink sheet set.

<table>
<thead>
<tr>
<th>Product name</th>
<th>Ink sheet size</th>
<th>No. of prints</th>
<th>Usage</th>
</tr>
</thead>
<tbody>
<tr>
<td>CK3020L4P</td>
<td>A4 size</td>
<td>70 (35 sheets x 2 packs)</td>
<td>Surface-laminated colour print (glossy)</td>
</tr>
<tr>
<td>CK3020LL4P</td>
<td>Letter long size</td>
<td>60 (30 sheets x 2 packs)</td>
<td>Surface-laminated colour print (glossy)</td>
</tr>
<tr>
<td>CK3020L4PM</td>
<td>A4 size</td>
<td>70 (35 sheets x 2 packs)</td>
<td>Surface-laminated colour print (matte)</td>
</tr>
<tr>
<td>CK3020LL4PM</td>
<td>Letter long size</td>
<td>60 (30 sheets x 2 packs)</td>
<td>Surface-laminated colour print (matte)</td>
</tr>
</tbody>
</table>

### REMOVING THE SHIPPING INSERTS

**REMOVING THE SHIPPING INSERTS ON THE PAPER TRAY SLOT**

1. Hold the tab on the shipping inserts and pull to the center.
2. Remove the other side of shipping inserts in the same way.

**NOTE**

Do not discard the shipping inserts. When you do not use the printer for a long period or transport this printer, make sure to attach the shipping inserts on the slot or the rollers may be deformed.

**REMOVING THE SPACER FROM THE PAPER TRAY**

1. Remove the cover on the paper tray.
2. Remove the spacer.
INSTALLATION OF INK SHEET

1. Press OPEN button to open the top cover.

2. If necessary, push the old ink cassette to the left and lift it up to remove it.

   **NOTE**
   Images remain on the ink sheet after printing. If you are working with confidential documents, you may need to consider alternative ways of disposing of the ink sheet to maintain security.

3. Remove old ink sheet from the ink cassette.
   Do not discard the ink cassette. It can be used repeatedly.

4. Remove the new ink sheet from its packaging.
   Touching the dye patches could contaminate the ink sheet, resulting in scratches on your prints.

5. Set the new ink sheet on the ink cassette as shown in the figure.

6. Hold the ink cassette by the handle, and slide the spool onto the 2 hubs on the left side.

7. Push the ink cassette against the hubs on the left until it engages with the 2 holders on the right.

8. Turn the thick spool in the direction shown by the arrow, until the ink sheet is taut.

9. Close the top cover.
INSTALLATION OF PRINT PAPER

The paper tray adjusts to the size of the paper you are installing. Do not force paper that is too long or too wide into the tray.

**NOTE**
- Use only the tray designed for this printer.
- A spacer for protection during transport is attached inside the paper tray when the printer is shipped from the factory. Remove this spacer when using the printer.

1. Pull down the plate lever of the paper tray until you hear a click.
2. If necessary, adjust the paper tray to fit the paper you are installing. Move the paper width adjuster and paper length adjuster according to the paper size you are installing. Move them as shown below.

<table>
<thead>
<tr>
<th>paper size</th>
<th>Paper width adjuster</th>
<th>Paper length adjuster</th>
</tr>
</thead>
<tbody>
<tr>
<td>A4</td>
<td>Raise</td>
<td>Raise</td>
</tr>
<tr>
<td>Letter long</td>
<td>Lay down</td>
<td>Lay down</td>
</tr>
</tbody>
</table>

3. Take the print paper out of the packaging together with the cardboard for protecting the printing surface.

**NOTE**
- The paper may be stuck together. Loosen the pages well before unpacking.
- The cardboard is placed on the top of the print paper to protect the printing surface. Take the cardboard together with print paper so that you do not touch the printing surface.

4. Place the paper in the tray with the cardboard on the top. Make sure that the front corners of the stack are under the metal tabs.
5 Remove the cardboard.

NOTE

- You can load only one pack of print paper supplied as paper sheet set. When adding the paper, take care not to exceed the red line on the paper tray. (50 sheets max.)

6 Set the paper cover onto the paper tray.

7 Install the paper tray in the printer.

8 Raise the stopper.
BEFORE OPERATION

USAGE AND STORAGE OF PAPER SHEET SET

■ BEFORE PRINTING
- Fingerprints or dust on the paper’s surface may degrade print quality and cause paper jams.
- When print paper is rapidly transferred from a cool place to a hot place, vapour or dew will be generated on the paper’s surface causing paper jams or degraded print quality. Leave the print paper in the room to stabilize its temperature before use.
- When print paper or ink sheet runs out during printing, the printing operation stops and the MEDIA indicator blinks. Set new ink sheet or print paper.
- Do not use wet or damaged paper. It may cause malfunction.
- Avoid touching or pulling the ink sheet with fingers. It may degrade the print quality.
- When the ink sheet is exhausted, replace it with a new one. Used ink sheet is not reusable.
- Do not open the print paper and ink sheet until you are ready to use them.
- The paper sheet set is a combination of ink sheet and print paper. Use the combination provided in the box. If the combination is changed, malfunction may occur.

■ AFTER PRINTING
- When the printed paper is touched with a wet hand, the print may be discoloured.
- Fading may occur if the print-face is exposed to organic chemical agents which may affect print paper (e.g. alcohol, ester, ketone based).
- Fading will be accelerated upon contact with PVC-based materials (e.g. adhesive tapes, rubber erasers, etc.).
- Do not put a print back into the paper tray. Doing so can cause jams and loss of completed prints.
- Store prints in a cool, dry environment free of chemical contamination. Avoid exposure to high intensity light sources, particularly fluorescent light and sunlight, which are high in ultraviolet radiation.

■ STORAGE OF PAPER SHEET SET
- Leaving the print paper in contact with PVC-based materials causes the print paper to discolour or become stained.
- Never store print paper close to heaters or in hot, humid or dusty places.

Keep print paper in a place where:
- Temperature: 5°C - 30°C (41°F - 86°F)
- Humidity: 20% - 60%RH
The printer driver is required to print the data from a personal computer connected with this unit. The printer driver for Windows® is supplied with this unit.

<table>
<thead>

</tr>
</tbody>
</table>

Refer to the “Read me” in the CD-ROM for installing the printer driver.

Windows® 98, Windows® Me, Windows® 2000 and Windows® XP are the registered trademarks of Microsoft Corporation in the U.S.A. and other countries.
# TROUBLESHOOTING

## INDICATION ON THE FRONT PANEL & COUNTERMEASURES

If for some reason printing is not possible or error occurs during printing, the indicators on the front panel will be lit. In this case, follow the procedure described below.

![ Indicators: lit  -  blinks  -  not lit ]

<table>
<thead>
<tr>
<th>ALARM</th>

</tr>
<tr>
<td><strong>The stored image in the memory cannot be enlarged to fill the maximum print area.</strong></td>
<td>Is the appropriate image data transferred?&lt;br&gt;→ Check the status.</td>
</tr>
<tr>
<td><strong>White or coloured lines or scratches appear on the printed image.</strong></td>
<td>Is there any dirt on the print paper or ink sheet?&lt;br&gt;→ Replace print paper and ink sheet with new one.</td>
</tr>
<tr>
<td><strong>Smudges, smears and fingerprints appear on the printed image.</strong></td>
<td>Are there any fingerprints, grease or oil on the paper or ink sheet?&lt;br&gt;→ Replace print paper and ink sheet with new one.</td>
</tr>
</tbody>
</table>
OVERCOMING PAPER JAMS

CLEARING A PAPER JAM FROM THE INK CASSETTE AREA

1. Press POWER button to turn off the printer.

2. Press OPEN button to open the top cover.

3. Remove the ink cassette.
   Push the ink cassette to the left and lift up to remove.

4. Pull out the jammed paper.
   Do not touch the thermal head right after printing as it is hot. Touching it may cause a burn or injury.

5. Install the ink cassette.
   
   **NOTE**
   Do not put partially-fed paper back into the paper tray. Discard any partially-fed paper from the paper tray.

CLEARING A PAPER JAM FROM THE FRONT AREA

1. Press POWER button to turn off the printer.

2. Remove the paper tray.

3. Pull out the jammed paper.

4. Install the paper tray.
   When installing the paper tray, make sure to pull down the plate lever of the paper tray until you hear a click.

   **NOTE**
   Do not put partially-fed paper back into the paper tray. Discard any partially-fed paper from the paper tray.
REPAIRING A TORN INK SHEET

1. Position the ink cassette with the torn ink sheet on a flat, clean surface.

2. Place a piece of office tape on the center of the ink sheet.

3. Wind the takeup spool counterclockwise so that the office tape is not seen and the ink sheet is straight.

4. Install the repaired ink cassette in the printer.
Cleaning as indicated below will help maintain stable printer operation and extend the printer’s life.

Preparations
Alcohol (isopropyl alcohol)
Tissue paper (Fold in half about 4 times, and use the folded side to clean.)
Cotton buds
Cleaning kit (Option)*

Other : Cleaner pen (Option)*
*Please ask the dealer about options.

Make sure to turn off the power before cleaning.

1 Turn off the power and press OPEN button to open the top cover.

2 Use a cloth or tissue paper moistened with alcohol to clean the thermal head, and wipe along the heater line three or four times.
Wipe the full length of the area (always in one direction).
Use a clean part of the cloth or tissue paper for each wipe.
Apply firm, even pressure.
Wipe only the areas shown right.

3 Allow the wiped area to dry for about two minutes.

4 Close the top cover, and turn on the power.

5 If image quality problems are still visible on the print, repeat steps 1 - 4.

NOTE
- Do not damage the thermal head.
- When the poor print quality is not corrected even if the head has been cleaned, replacement of the thermal head may be required. Contact your dealer.
- The thermal head is hot directly after printing. Wait until the head cools before cleaning the thermal head.
**SPECIFICATIONS**

Class: Digital colour printer

Model: CP3020DE

Printing method: Thermal Dye Sublimation

3 colour faces progressive printing (yellow, magenta and cyan) and surface lamination

Print quality:
- Dot resolution: Max. 3134 x 2508 pixels (A4 size)
- Max. 314 PPI

Number of grades: 256 (8 bits) for each colour (About 16.7 million colours)

Printing time:
- A4 size: Approx. 77 sec./sheet (glossy)
- Letter long size: Approx. 90 sec./sheet (glossy)

Ink sheet: Special cartridge method

Print paper: Special cut paper

Supply method: Automatic (cut paper)

Interface: USB Ver1.1

Power supply: AC220-240V, 50/60 Hz

Power consumption:
- 1.35A (AC220-240V, 50/60 Hz) during printing (0.2A when not printing)

Installation conditions:
- Temperature: 5°C - 35°C (41°F - 95°F)
- Humidity: 30% - 80% (No dewing)

Operation altitude: Within Horizontal ±5°

Outside dimensions: 402(W) x 231(H) x 378(D) mm

Weight: 14kg (without paper tray)

Accessories: Power cord (1), Ink cassette (1), Paper tray (1), CD-ROM (1), Quick setup guide (1)
